

# 9.1 ESSEX COUNTY

This section presents the jurisdictional annex for Essex County. The annex includes a general overview of the County; an assessment of Essex County's risk, vulnerability, and mitigation capabilities; and a prioritized action plan to implement prior to a disaster to reduce future losses and achieve greater resilience to hazards.

# 9.1.1 Hazard Mitigation Planning Team

The following individuals are Essex County's identified HMP update primary and alternate points of contact.

| Table 9.1-1. Hazard Mit | gation Planning Team  |

# 9.1.2 County Profile

Section 3 (County Profile), Volume I of this HMP includes details on Essex County's population, location, climate, history, growth, and development.

# 9.1.3 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. The jurisdictional annexes for each municipality summarize recent and expected future development trends, including major residential/commercial development and major infrastructure development. Essex County reviews every proposed subdivision in the County. The County reviews every site plan for proposed development that will impact County facilities (e.g. stormwater pipes, county roads, etc.).

# 9.1.4 Capability Assessment

Essex County performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 5 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Information on National Flood Insurance Program (NFIP) compliance.
- Classification under various community mitigation programs.
- Adaptive capacity for the impacts of climate change.

Areas that mitigation is currently integrated are summarized in Capability Assessment (subsection 9.1.4). Essex County identified specific integration activities that will be incorporated into municipal procedures are included in the updated mitigation strategy. Refer to Appendix X for the results of the planning/policy document review and the answers to integration survey questions.

### PLANNING, LEGAL AND REGULATORY CAPABILITY

The table below summarizes the legal and regulatory tools that are available to Essex County.

flooding, heat waves and sea level rise. The study consisted of the following activities: conduct a vulnerability assessment of the area's transportation system; project future climate risks for the Passaic River Basin; develop adaptation strategies for critical transportation corridors and assets; develop recommended actions and strategies to protect the transportation system from damage and disruption. Many of the strategies identified in this plan are already being integrated by Essex County. This includes: increasing capacity of stormwater infrastructure and drainage systems, installing energy system back-ups (e.g. generators and solar panels), incorporating redundant power and communication lines and systems, implementing green infrastructure (e.g. tree planting), conducting routine maintenance of culverts and storm sewers (county and municipal level), incorporate floodproofing were appropriate at critical facilities, and conducting maintenance on flood-impacted infrastructure.

- Comment:
  - Comprehensive Energy Master Plan (2011) This plan included a review of the County's existing energy operations at all county-owned or occupied facilities and developed a strategic energy master plan to act as a blueprint for future County initiatives concentrated at accomplishing increasing energy efficiency and conservation, reducing energy consumption, decreasing energy costs, reducing greenhouse gas emissions, identifying renewable energy options, and increasing the use of sustainable practices. Essex County is implementing these goals, including the recent installation of solar panels at the DPW headquarters located in Verona.
  - Complete Streets Policy (2015) Complete Streets policy; adopted by the Board of Chosen Freeholders on April 25, 2015 making "Complete Streets" an official policy of the County. It sets a mandate for the future design of County's roads and bridges.
  - Invasive Species Management Plan
  - Open Space Plan it is expired and holding back the County's ability to complete acquisitions (2020-ESSEX COUNTY-018)
  - Waste Water Management Plan (December 4, 2014) This plan provides a comprehensive Wastewater Management Plan for Essex County. It is intended to project future development and the associated wastewater management and water supply requirements with that development. The planning process of this plan was designed to protect environmentally sensitive areas and to reduce pollutant loads to the groundwater. The environmentally sensitive areas are based on mapped data by NJDEP and includes wetlands, floodprone areas, and designated river areas. The plan includes mapped flood areas throughout Essex County.
  - Strategic Recovery Planning Report (SRPR)- This plan was prepared as part of the New Jersey Department of Community Affairs' Post Sandy Planning Assistance Grant Program. Utilizing the 2015 HMP, the plan provided a recommendation of projects, categorized as hazard mitigation or preparedness. A more detailed land use analysis was conducted for the SRPR. For example, an exposure analysis was completed to assess the vulnerability of the residential and non-residential land uses with in the County to flooding. This has been included in the Hazard Mitigation Plan in the appropriate hazard profiles. Since the plan was adopted, the County has worked on addressing the recommendations of the plan including the following. The County continues to work through the recommendations of the SRPR:
    - *Preparing to update the current Essex County Master Plan (Essex County Transportation Plan)*
    - *Reviewing and updating zoning and land use regulations, as appropriate. While zoning is controlled by the local government, the County still provides input in what should be included.*

| Does your jurisdiction issue development permits? | Yes  |
| - If no, who does? If yes, which department?      | Essex County Department of Public Works issues permits to construct,<br>improve, work on, or occupy the County's sidewalks and roadways.<br>Anyone who wants to perform work on County streets or sidewalks<br>needs to obtain a permit from the Department of Public Works. |

|  | The County will review site plans that impact County facilities (e.g. roads, drainage systems, county parks, county buildings). All subdivisions proposed in Essex County need to be by approved by Essex County Planning. |
|--|--|
| Does your jurisdiction have the ability to track permits by hazard area?   | No – the County can track permits but not by hazard areas  |
| Does your jurisdiction have a buildable lands<br>inventory?<br>-If yes, please describe briefly.<br>-If no, please quantitatively describe the level of<br>buildout in the jurisdiction. | No, the County does not have a buildable lands inventory. Essex County is nearly 100% developed.   |

#### ADMINISTRATIVE AND TECHNICAL CAPABILITY

The table below summarizes potential staff and personnel resources available to Essex County.

| Staff/Personnel Resource  | Available? | Department/Agency/Position   |
|---|------------|--|
| Administrative Capability   |            |  |
| Planning Board  | Yes        | County Planning Board  |
| Mitigation Planning Committee   | No         | -  |
| Environmental Board / Commission  | Yes        | Essex County Environmental Commission; there<br>are numerous groups in the County completing<br>outreach on green infrastructure and climate<br>change, including Rutgers Cooperative Extension,<br>Rutgers Water Resources Program and ANJEC  |
| Open Space Board / Committee  | Yes        | Open Space   |
| Economic Development Commission / Committee   | Yes        | Essex County Department of Economic<br>Development, Training, and Employment   |
| Warning Systems / Services<br>(reverse 911, outdoor warning signals)                    | Yes        | The Communications Center monitors and directs<br>all field units through the use of a computer aided<br>dispatch (CAD) system. The CAD system is<br>capable of tracking unit locations, creating incident<br>files, applying hazard alerts to addresses, and<br>creating statistical reports on crime and incident<br>data. The municipalities utilize Nixle to rely<br>emergency alerts to residents who register with the<br>program. |
| Maintenance program to reduce risk  | Yes        | Tree inspections/trimming; catch basin<br>maintenance and clearing; road inspections; the<br>County is currently developing a snow plow task<br>force  |
| Mutual aid agreements   | Yes        | Municipalities within the County, surrounding counties, UASI   |
| Technical/Staffing Capability   |            |  |
| Planners or engineers with knowledge of land development and land management practices  | Yes        | County Engineering   |
| Engineers or professionals trained in building or infrastructure construction practices | Yes        | Engineering inspectors and licensed engineers  |
| Planners or engineers with an understanding of natural hazards                          | Yes        | Engineering and Planning Departments   |
| Staff with training in benefit/cost analysis  | No         | -  |
| Staff with training in green infrastructure   | Yes        | Engineering and Planning Departments   |
| Staff with education/knowledge/training in low impact development                       | Yes        | Engineering and Planning Departments   |
| Surveyors   | Yes        | Engineering Department   |
| Stormwater engineer   | Yes        | Engineering Department   |

# Table 9.1-4. Administrative and Technical Capabilities

| Staff/Personnel Resource                              | Available? | Department/Agency/Position            |
|---|------------|---------------------------------------|
| Personnel skilled or trained in GIS applications      | Yes        | Essex County Sheriff's GIS Department |
| Scientist familiar with natural hazards in local area | No         | -                                     |
| Emergency manager                                     | Yes        | Essex County Sheriff's OEM            |
| Grant writers   | Yes        | Administrator's Office                |
| Resilience Officer                                    | No         |                                       |
| Watershed planner                                     | No         |                                       |
| Environmental specialist                              | Yes        | Engineering and Planning Departments  |
| Other   | No         |                                       |

#### FISCAL CAPABILITY

The table below summarizes financial resources available to Essex County.

| Financial Resource                                     | Accessible or Eligible to Use?  |
|--|---|
| Community Development Block Grants (CDBG, CDBG-DR)     | Yes   |
| Capital Improvements Project Funding                   | Yes   |
| Authority to Levy Taxes for Specific Purposes          | No - not on county level  |
| User Fees for Water, Sewer, Gas or Electric Service    | No - not on county level  |
| Incur Debt through General Obligation Bonds            | Yes   |
| Incur Debt through Special Tax Bonds                   | Yes   |
| Incur Debt through Private Activity Bonds              | No  |
| Withhold Public Expenditures in Hazard-Prone Areas     | Yes   |
| State-Sponsored Grant Programs                         | Yes   |
| Development Impact Fees for Homebuyers or Developers   | Yes   |
| Clean Water Act 319 Grants (Nonpoint Source Pollution) | Yes   |
| Other  | Yes - state and federal transportation funding, homeland security, UASI |

# **EDUCATION AND OUTREACH CAPABILITY**

The table below summarizes the education and outreach resources available to Essex County.

### Table 9.1-6. Education and Outreach Capabilities

| Criterion   | Response   |
|---|--|
| Do you have a public information officer or communications office?  | Yes  |
| Do you have personnel skilled or trained in website development?  | Yes; however, it is performed by an outside consultant   |
| Do you have hazard mitigation information available on your website? <ul> <li>If yes, briefly describe.</li> </ul>                            | Yes – emergency alerts on the County website, reverse<br>911 calls prior to and during hazard events at the<br>municipal level |
| Do you use social media for hazard mitigation education and<br>outreach?<br>If yes, briefly describe.   | Yes – the County utilizes Facebook and Twitter; the<br>various county departments have their own social<br>media accounts      |
| Do you have any citizen boards or commissions that address issues<br>related to hazard mitigation?<br>If yes, briefly describe.               | No   |
| Do you have any other programs already in place that could be<br>used to communicate hazard-related information?<br>If yes, briefly describe. | Yes – municipal websites   |

| Criterion  | Response   |
|--|--|
| <ul><li>Do you have any established warning systems for hazard events?</li><li>If yes, briefly describe.</li></ul> | Yes - emergency alerts on the County website, reverse<br>911 calls prior to and during hazard events at the<br>municipal level |

### **COMMUNITY CLASSIFICATIONS**

The table below summarizes the classifications for community programs available to Essex County.

| Program  | Participating? | Classification | Date Classified |
|--|----------------|----------------|-----------------|
| Community Rating System                              | N/A            | -              | -               |
| Building Code Effectiveness Grading Schedule (BCEGS) | N/A            | -              | -               |
| Public Protection (Fire ISO Protection Class)        | N/A            | -              | -               |
| Storm Ready Certification                            | No             | -              | -               |
| Firewise Community Classification                    | No             | -              | -               |

### Table 9.1-7. Community Classifications

N/A = Not applicable

#### ADAPTIVE CAPACITY

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current ability to adjust to, protect from, or withstand a hazard event. This term is often discussed in reference to climate change; however, adaptive capacity also includes an understanding of local capacity for adapting to current and future risks and changing conditions. The table below summarizes the adaptive capacity for each hazard and the jurisdiction's rating.

- Does the County have access to resources to determine the possible impacts of climate change upon the County and its municipalities? Yes
- Is the administrative supportive of integrating climate change in policies or actions? Yes
- Is climate change already being integrated into current policies/plans or actions (projects/monitoring) within the County? Yes many of the recommended strategies identified in the NJTPA Passaic River Basin Climate Resilience Planning Study are currently being implemented and integrated by the County. This includes: increasing capacity of stormwater infrastructure and drainage systems, installing energy system back-ups (e.g. generators and solar panels), incorporating redundant power and communication lines and systems, implementing green infrastructure (e.g. tree planting), conducting routine maintenance of culverts and storm sewers (county and municipal level), incorporate floodproofing were appropriate at critical facilities, and conducting maintenance on flood-impacted infrastructure.

# Table 9.1-8. Adaptive Capacity of Climate Change

| Hazard  | Adaptive Capacity (Capabilities) -<br>High/Medium/Low |  |  |
|---|---|--|--|
| Coastal Erosion and Sea Level Rise                    | Low   |  |  |
| Coastal Storm (Hurricane, Tropical Storm, Nor'Easter) | Medium  |  |  |
| Drought   | Low   |  |  |
| Earthquake  | Medium  |  |  |
| Extreme Temperature                                   | High  |  |  |
| Flood   | High  |  |  |

| Hazard   | Adaptive Capacity (Capabilities) -<br>High/Medium/Low |  |  |
|--|---|--|--|
| Geological hazards (landslide, subsidence, sinkholes)  | High  |  |  |
| Severe Weather   | High  |  |  |
| Severe Winter Weather  | High  |  |  |
| Wildfire   | Low   |  |  |
| Civil Disorder   | Medium  |  |  |
| Cyber Attack   | Low   |  |  |
| Disease Outbreak (West Nile Virus, Eastern Equine Encephalitis, St. Louis<br>Encephalitis, La Crosse Encephalitis, Lyme Disease, Influenza, Ebola Virus) | Medium  |  |  |
| Economic Collapse (new)  | Low   |  |  |
| Hazardous Substances   | High  |  |  |
| Power Failure  | High  |  |  |
| Terrorism  | Medium  |  |  |
| Transportation Failure (vehicular accidents, aviation accidents, railway failures and accidents, roadway and bridge failures)                            | Medium  |  |  |

Notes:

High = Capacity exists and is in use; Medium = Capacity may exist, but is not used or could use some improvement;

Low = Capacity does not exist or could use substantial improvement; Unsure = Not enough information is known to assign a rating.

### NATIONAL FLOOD INSURANCE PROGRAM

Management and regulation of the regulatory floodplains are done at the local level. Refer to the individual jurisdictional annexes for details on the NFIP for each municipality.

# ADDITIONAL AREAS OF EXISTING INTEGRATION

- Land Use Planning The Essex County Planning Department supports all aspects of local planning and seeks to integrate natural hazard risk and support mitigation project identification and implementation through its planning programs and resources.
- Emergency Management Plans Essex County continues to develop, enhance, and implement existing emergency response plans to utilize new and developing technology and information as it becomes available.
- Essex County has regularly scheduled meetings with Emergency Managers from each community. Training for all municipalities and colleges are provided for all community emergency response teams (CERT) within the County. In addition, the County has organized instructor-led training from utility companies regarding generator safety for LEPC members. LEPC meetings include agency representatives from public, private, utilities, non-profits, educational institutions.
- Coastal evacuation routes are displayed along roadways in the County.
- The Sheriff's Office and Community Affairs attend meetings to present information regarding mitigation, response, resource availability, grant programs and flood map updates at County and municipal events.
- The Sheriff's Office provides a significant amount of safety tips on their website (https://www.essexsheriff.com/safety-tips/). This includes informational brochures including terrorism preparedness, severe weather driving tips, making a 'go kit', and winter driving tips.
- The Sheriff's Office attends public events and distributes informational brochures about hazard risk and mitigation to attendees. Recent events include Essex County Senior Wellness Day and Essex County National Night Out.

# 9.1.5 Hazard Event History Specific to the Jurisdiction

Essex County has a history of hazard events, as detailed in Section 4 (Risk Assessment) of this plan. Since 1954, Essex County has been included in 28 FEMA disaster declarations. Of which, seven were identified as hurricane events, six identified as flood events, six identified as severe storm events, four identified as snow events, two identified as drought events, two identified as other (West Nile Virus and water shortage), and one identified as fire. A summary of historical events appears in each hazard profile of the plan and includes a chronology of events that have affected the County and its municipalities.

# 9.1.6 Jurisdiction-Specific Vulnerabilities and Hazard Ranking

The hazard profiles in Section 4 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Table 9.1-9 summarizes the Essex County risk assessment results and data used to determine the hazard ranking. The following summarizes the hazards of greatest concern and risk to Essex County.

In an attempt to summarize the confidence level regarding the input utilized to populate the hazard ranking, a gradient of certainty was developed. A certainty factor of high, medium or low was selected and assigned to each hazard to provide a level of transparency and increased understanding of the data utilized to support the resulting ranking. The following scale was used to assign a certainty factor to each hazard:

- High—Defined scenario/event to evaluate; probability calculated; evidenced-based/quantitative assessment to estimate potential impacts through hazard modeling.
- Moderate—Defined scenario/event or only a hazard area to evaluate; estimated probability; combination of quantitative (exposure analysis, no hazard modeling) and qualitative data to estimate potential impacts.
- Low—Scenario or hazard area is undefined; there is a degree of uncertainty regarding event probability; majority of potential impacts are qualitative.

| Hazard of<br>Concern             | Hazard/ Scenario(s)<br>Evaluated                     | Populat  | ion                                   | Buildings  |  | Eco   | nomy (Loss)   | Certainty<br>Factor |      |
|----------------------------------|--|--|---------------------------------------|--|--|---|---|---------------------|------|
|                                  | Coastal Erosion Hazard                               | CEHA:  | 0                                     | CEHA:  | 0  | CEHA:   | \$0   |                     |      |

### **REPETITIVE FLOOD LOSSES**

Refer to the municipal annexes for details on the number of repetitive loss, severe repetitive loss, and the number of mitigated properties in each municipality.

# **CRITICAL FACILITIES AND LIFELINES**

The table below identifies critical facilities and lifelines owned by the County located in the 1-percent and 0.2percent floodplain and whether or not the facility has already been mitigated, or a project is identified and included in the updated mitigation strategy.

|  |                             | Exposure |               |  |
|--|-----------------------------|----------|---------------|--|
| Name                                     | Туре                        | 1% Event | 0.2%<br>Event | Status of Mitigation   |
| ECSO Equipment<br>Storage Facility       | Police                      | Х        | Х             | 2020-ESSEX COUNTY-019  |
| ECSO Bureau of<br>Narcotics              | Government                  |          | х             | Bureau of Narcotics has been relocated and located on the<br>second floor of the building located at 115 Clifton Ave.,<br>Newark; the OEM offices at this facility have been<br>mitigated (elevated)   |
| Essex County<br>Airport                  | Airport                     | Х        | Х             | Essex County Improvement Authority owns the airport – communicate with the Authority to recommend mitigation measures – 2020-ESSEX-2020  |
| Essex County<br>Correctional<br>Facility | Correctional<br>Institution | Х        | X             | Purchase additional high water vehicles (2020-ESSEX<br>COUNTY-014) as a mode of transportation to and from<br>the facility; floodwalls are not feasible due to the<br>deployment and storage of floodwalls; it is not feasible to<br>elevate the structure |

# Table 9.1-10. Potential Flood Losses to Critical Facilities and Lifelines

# ADDITIONAL IDENTIFIED VULNERABILITIES

Refer to Section 4 (Risk Assessment) and the municipal annexes for vulnerable areas throughout the County.

# HAZARD AREA EXTENT AND LOCATION

Hazard area extent and location maps were generated for Essex County that illustrate the probable areas impacted. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which Essex County has significant exposure. Count maps are located in each hazard section in the Risk Assessment (Section 4).

#### HAZARD RANKING

The hazard ranking process involves an assessment of the likelihood of occurrence for each hazard; its potential impacts on people, property, and the economy; community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 4.4 (Hazard Ranking), each plan participant may have differing degrees of risk exposure and vulnerability compared to Essex County as a whole. Therefore, each jurisdiction ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential hazards across Essex County. The Steering Committee and Planning Committee reviewed the Essex County hazard ranking table, as well as its individual results, to reflect the relative risk of the hazards

of concern to the County. During the review of the hazard ranking, the calculated rankings were adjusted to incorporate the perceived adaptive capacity with respect to the relevant hazard.

- The County adjusted the calculated draft 2020 ranking for wildfire from low to medium due to the lack of sufficient response equipment (refer to Table 9.1-13, action 2020-ESSEX COUNTY-12) and insufficient hydrant capacity and tenders on hand (action 2020-ESSEX COUNTY-15).
- The County adjusted the calculated draft 2020 ranking for terrorism from low to high. This is because the County has several high-profile locations (hospitals, schools, commercial establishments) and critical infrastructure in the County.

| Coastal Erosion<br>and Sea Level<br>Rise | Coastal<br>Storm | Drought      | Earthquake | Extreme<br>Temperature | Flood        |
|--|------------------|--------------|------------|------------------------|--------------|

| Outbreak | Collapse | Substances | Outrages |           | Failure        |
| Medium   | Medium   | Medium     | High     | High      | Medium         |

# 9.1.7 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and provides action prioritization.

# PAST MITIGATION INITIATIVE STATUS

The following table summarizes the County's progress on their mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the updated mitigation strategy (Table 9.1-13) followed by its prioritization (Table 9.1-14). Previous actions that are now on-going programs and capabilities are indicated as such in the following table and can also be found under 'Capability Assessment' presented previously in this annex. Appendix X provides all attributes associated with the 2015 HMP mitigation strategy.

| Essex-<br>26 | Develop design standards to address the visual<br>impact of mitigation measures such as<br>elevating bulkheads, elevating buildings on<br>foundations or pilings, etc. Such design<br>standards might include requirements for<br>skirting exposed pilings, parking under the<br>lowest habitable floor, using exterior decking<br>to stagger stairways to elevated first floor<br>levels, etc. | Division of<br>Planning  | No Progress – County cannot<br>give design standards, this<br>would need to be done at the<br>jurisdictional level                                      |                 |                                  |
| Essex-<br>27 | Develop a County Multi-jurisdiction Wildfire<br>Preparedness Plan. Identify updated drafting<br>locations in the reservation to ensure<br>accessibility for pump trucks.  | Essex County<br>Sheriff's Office<br>of Emergency<br>Management | No Progress   | Х               | 2020-<br>ESSEX<br>COUNTY-<br>011 |
| Essex-<br>28 | Purchase a wildfire "brush truck" to combat<br>wildfires within County  | Essex County<br>Sheriff's Office<br>of Emergency<br>Management | No Progress   | Х               | 2020-<br>ESSEX<br>COUNTY-<br>012 |
| Essex-<br>29 | Provide continued education, training and<br>exercise opportunities to first responders and<br>other local officials regarding floodplain<br>management, natural and human-caused<br>hazards and the Community Rating System.   | Essex County<br>Sheriff's Office of<br>Emergency<br>Management | Ongoing Capability - This is<br>considered a capability. The<br>Sheriff's Office  |                 |                                  |
| Essex-<br>30 | Adopt new County roof standards to mitigate natural hazards   | Division of<br>Planning  | No Progress – this is done at<br>the state level building code<br>(UCC)   |                 |                                  |
| Essex-<br>31 | Revise County development standards which<br>are used when evaluating private development<br>along County roads to include more resilient<br>building standards.  | Division of<br>Planning  | Ongoing Capability – next<br>revisions will be done in 2021   |                 |                                  |
| Essex-<br>32 | Construct new Passaic River bridge crossing in<br>the Newark area to relief currently over-<br>burdened bridges and provide additional traffic<br>redundancy in case of another hazard  | Essex County<br>Department of<br>Public Works                  | No Progress – keep in the 2020<br>HMP- would need to work with<br>Hudson County   | Х               | 2020-<br>ESSEX<br>COUNTY-<br>013 |
| Essex-<br>33 | Acquire additional high water vehicles that will<br>permit ingress/egress of essential personnel and<br>supplies during disasters   | Essex County<br>Sheriff's Office of<br>Emergency<br>Management | In Progress – Sheriff's Office<br>has a few; County could use<br>more (DPW)   | Х               | 2020-<br>ESSEX<br>COUNTY-<br>014 |
| Essex-<br>34 | Retrofit the County Dispatch Communications<br>Center in Newark for flood and high winds.   | Essex County<br>Sheriff's Office of<br>Emergency<br>Management | No Progress – remove from the<br>HMP  |                 |                                  |

In addition to the above progress, Essex County identified the following mitigation projects/activities that were completed but not identified in the 2015 HMP mitigation strategy:

• The Essex County OEM building is located in the floodplain and experienced flood damages in the past. The building has been mitigated by elevating one foot above the base flood elevation.

- Essex County received federal funds as a result of Superstorm Sandy in 2012. The County utilized grant funding to purchase and install backup power capabilities at critical facilities to provide continuity of operations during power outages:
  - Purchased and install photovoltaic power generation system (solar panels) at the DPW headquarters located at 900 Bloomfield Avenue in Verona
  - Purchased generators for critical facilities DPW building at 900 Bloomfield Avenue in Verona, Essex County Patrol Division Headquarters in Newark, DPW fleet headquarters in Cedar Grove, and Roads/Bridges Headquarters in Cedar Grove.
- The County received FEMA Pre-Disaster Mitigation funding to update the 2015 HMP.

# **PROPOSED HAZARD MITIGATION INITIATIVES FOR THE PLAN UPDATE**

Essex County participated in a risk assessment workshop in September 2019 in which detailed information was provided about assets exposed and vulnerable to the identified hazards of concern. The County participated in a mitigation action workshop in October 2019 and was provided a Mitigation Toolbox that included a mitigation catalog developed specifically for Essex County and its hazards of concerns; challenges and opportunities identified during the capability and risk assessments; available federal and state funding sources, and the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 *Selecting Appropriate Mitigation Measures for Floodprone Structures* (March 2007) and FEMA *Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards* (January 2013). Section 6 (Mitigation Strategy) and Appendix X (Mitigation Strategy Supplement) provide a more complete description of the Mitigation Toolbox and its resources.

Table 9.1-13 summarizes the comprehensive-range of specific mitigation initiatives Essex County would like to pursue in the future to reduce hazard impacts; some actions have been carried forward from the 2015 HMP. Initiatives are dependent upon available funding (grants and local match availability) and can be modified or omitted at any time based on the occurrence of new hazard events and changes in County priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6 (Mitigation Strategy), 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing actions as *High*, *Medium*, or *Low*. The table below summarizes the evaluation of each mitigation initiative, listed by action number.

Table 9.1-14 provides a summary of the prioritization of all proposed mitigation initiatives for this HMP update.

| Initiative<br>Number                                     | Mitigation<br>Initiative<br>Name                                      | Description of the Problem and Solution   | New or<br>Existing<br>Assets? | Hazard(s)<br>to be<br>Mitigated                  | Goals<br>Met | <u>Lead</u> and<br>Support<br>Agencies   | Potential Funding<br>Sources           | Estimated<br>Benefits  | Estimated<br>Cost | Timeline    | Priority | Mitigation<br>Category | CRS Category |
|--|---|---|-------------------------------|--|--------------|--|--|--|-------------------|-------------|----------|------------------------|--------------|
| 2020-<br>ESSEX<br>COUNTY-<br>001<br>(previous<br>action) | Backup power<br>for County<br>facilities                              | <ul> <li>Problem: Several County facilities do not have backup power to provide continuity of operations during a utility interruption. These facilities provide essential services to Essex County and its residents.</li> <li>Solution: Obtain backup power for the following facilities:         <ul> <li>Essex County K9/Bomb building – portable generator</li> <li>OEM Storage/Crime Scene Facility – portable generator</li> </ul> </li> </ul>   | Existing                      | Utility<br>Interruption                          | 2, 6         | Essex County<br>Sheriff's Office   | FEMA HMGP                              | Provide<br>continuity of<br>operations to<br>the County<br>during utility<br>interruptions               | \$100,000         | 2 years     | High     | SIP                    | PP,<br>ES    |
| 2020-<br>ESSEX<br>COUNTY-<br>002<br>(previous<br>action) | Essex County<br>Traffic<br>Control<br>Transfer<br>Switch<br>generator | <ul> <li>Problem: The Essex County traffic control transfer switch does not have backup power.</li> <li>During a utility interruption, this system cannot function properly and can create a transportation hazard for County personnel and residents.</li> <li>Solution: Purchase a portable generator to use during a utility interruption to operate the County's traffic control transfer switch.</li> </ul>  | Existing                      | Utility<br>Interruption                          | 2,6          | Essex County<br>Sheriff's Office   | FEMA HMGP                              | Allow transfer<br>switch to<br>operate during<br>utility<br>interruptions                                | \$100,000         | 2 years     | High     | SIP                    | PP,<br>ES    |
| 2020-<br>ESSEX<br>COUNTY-<br>003<br>(previous<br>action) | Enlarge<br>drainage<br>system on JFK<br>Parkway in<br>Millburn        | Problem: During heavy rains, JFK Parkway in<br>Millburn becomes inundated due to the drainage<br>systems becoming overwhelmed. This leads to<br>road closures, creating a hazard for emergency<br>personnel and residents.           Solution: Enlarge the drainage system on JFK<br>Parkway in Millburn to reduce or eliminate<br>flooding that occurs in this area.   | Existing                      | Coastal<br>Storm,<br>Severe<br>Weather,<br>Flood | 1, 2         | County<br>Engineering<br>Office  | CDBG, TIGER,<br>County Budget          | Reduces or<br>eliminates<br>flood damage,<br>allow road to<br>remain open<br>during heavy<br>rain events | \$1 million       | 5<br>years+ | Medium   | SIP                    | РР           |
| 2020-<br>ESSEX<br>COUNTY-<br>004<br>(previous<br>action) | Evaluate<br>drainage<br>systems in<br>Essex County                    | <ul> <li>Problem: The drainage systems in the area of<br/>Passaic Avenue and Bloomfield Avenue in Verona<br/>and JFK Parkway in South Orange and Millburn<br/>become overwhelmed during heavy rain events,<br/>leading to flooding of roadways and surrounding<br/>properties. This results in road closures,<br/>restricting access to these sections of the County.</li> <li>Solution: Conduct a study to evaluate drainage<br/>systems on roadways to reduce the impacts of<br/>flooding. - N/A Not applicable
- NFIP National Flood Insurance Program
- OEM Office of Emergency Management

Mitigation Category:

- Local Plans and Regulations (LPR) These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.
- Structure and Infrastructure Project (SIP) These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.
- Natural Systems Protection (NSP) These are actions that minimize damage and losses and preserve or restore the functions of natural systems.
- Education and Awareness Programs (EAP) These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities.

CRS Category:

- Preventative Measures (PR) Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.
- Property Protection (PP) These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, structural retrofits, storm shutters, and shatter-resistant glass.
- Public Information (PI) Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.
- Natural Resource Protection (NR) Actions that minimize hazard loss and preserve or restore the functions of natural systems. Actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.
- Structural Flood Control Projects (SP) Actions that involve the construction of structures to reduce the impact of a hazard. Structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.
- Emergency Services (ES) Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities.

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

# 9.1.8 Staff and Local Stakeholder Involvement in Annex Development

Essex County followed the planning process described in Section 2 (Planning Process). This annex was developed over the course of several months with input from many County department representatives. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization. The following table summarizes who participated and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 2 (Planning Process) and Appendix X (Meeting Documentation).

| Name              | Title   | Method of Participation   |
|-------------------|---|---|
| Edward Esposito   | ECSO – Captain  | Reviewed annex, attended meetings, contributed to mitigation strategy |
| Stephanie Knox    | ESCO - Detective  | Reviewed annex, attended meetings, contributed to mitigation strategy |
| Ryan Peter        | ECSO – Detective  | Reviewed annex, attended meetings, contributed to mitigation strategy |
| Michael Capodanno | ECSO – Sergeant   | Reviewed annex, attended meetings, contributed to mitigation strategy |
| Sanjeev Varghese  | Division of Engineering<br>– Public Works Director<br>and County Engineer | Reviewed annex, attended meetings, contributed to mitigation strategy |
| Luis Rodriguez    | Assistant County<br>Engineer  | Reviewed annex, attended meetings, contributed to mitigation strategy |
| David Antonio     | Division of Planning -<br>County Planner                                  | Reviewed annex, attended meetings, contributed to mitigation strategy |
